

Action steps for around your home:

- **CLEAR** leaves and other vegetative debris from roofs, gutters, porches and decks. This helps prevent embers from igniting your home.
- **REMOVE** dead vegetation and other items from under your deck or porch, and within 10 feet of the house.
- **SCREEN** in areas below patios and decks with wire mesh to prevent debris and combustible materials from accumulating.
- REMOVE flammable materials (wood piles, propane tanks) within 30 feet of your home's foundation and outbuildings, including garages and sheds. If it can catch fire, don't let it touch your house, deck or porch.
- Wildfire can spread to tree tops. PRUNE trees so the lowest branches are 6 to 10 feet from the ground.
- KEEP your lawn hydrated and maintained. If it is brown, cut it down to reduce fire intensity. Dry grass and shrubs are fuel for wildfire.
- Don't let debris and lawn cuttings linger. DISPOSE of these items quickly to reduce fuel for fire.
- INSPECT shingles or roof tiles. Replace or repair the shingles that are loose or missing to prevent ember penetration.
- COVER exterior attic vents with metal wire mesh no larger than 1/8 inch to prevent sparks from entering the home.
- **ENCLOSE** eaves and screen soffit vents using 1/8 mesh metal screening to prevent ember entry.

The more actions a community takes, the more fire adapted it becomes. Learn how you can make a difference in your community. Visit www.fireadapted.org and www.firewise.org for more information.

FACT

- There are more than **45** million homes near or in the wildland.
- ! More than **72,000** U.S. communities are now at risk from wildfire.
